

# FLIR Vessel Vision

Forward Vision for Safer Pushboat Operations

## Wireless Barge Mount Camera Solution

Improve safety, visibility, and control with our portable FLIR thermal camera—designed for pushboat operations. Mounted magnetically on the lead barge and battery-powered, it wirelessly streams real-time thermal video to the wheelhouse. Optional object tracking gives captains a clear view ahead, reducing risks and enhancing navigation.

- ✓ Improved Safety – Navigate confidently in dark or visually impaired waters
- ✓ Reduced Accidents – Spot potential hazards before they become threats
- ✓ Better Control – Maintain full awareness of barge alignment and environmental conditions
- ✓ No Line-of-Sight Obstruction – Get the view from the barge's bow, not blocked by cargo
